EXPERIENCE

Humanity Alliance Organization (HAO)

Jul. 2025 – Aug. 2025

Front End Developer (Intern)

Lahore

Developed responsive and user-friendly web interfaces using React and Next.js, focusing on modern UI design and component-based architecture. Implemented multiple frontend features including dynamic pages, theme switching, and optimized layouts to enhance user experience and performance.

Elevvo Pathways

July 2025

Front End Development (Intern)

Remote

Designed and implemented responsive UI interfaces and components using HTML, CSS, JavaScript and React.js ensuring cross-browser compatibility and mobile-first design. Built interactive features while following clean code practices, modular structure, and modern frontend development standards.

EDUCATION

FAST NUCES Lahore

2022 – 2026

BS(EE) (Computer Engineering)

Punjab College, Lahore

2019 – 2021

FSc. Pre Engineering

PROJECTS

AI Powered Job Preparation and Recruitment Platform (Final Year Project)

- Developed a **Full-Stack Unified Ecosystem** integrating Student, Company, and University portals using Next.js, Node.js, Express.js, and MongoDB, enabling seamless interaction between all stakeholders.
- Built an **AI-powered recruitment system** with resume analyzer, resume builder, and intelligent job-candidate matching to automate and optimize hiring workflows.
- Integrated **real-time AI interview system using Vapi LLM**, supporting mock interviews and live assessments with automated evaluation and feedback for students.
- Implemented a job and campus drive management platform for companies and universities, along with an in-browser coding environment using **Monaco Editor** for interactive problem-solving and practice.

Video Streaming Platform

- Built a responsive YouTube similar front-end using React with real-time data from the YouTube Data API.
- Integrated YouTube API to dynamically fetch and display video thumbnails, titles, and channel info.

Social Media Dashboard (MERN Stack)

- Developing a social platform dashboard where users can create posts, interact through likes and comments, and manage profiles. Includes JWT-based authentication, dynamic front-end rendering, and backend API development to support real-time user interactions.

CryptoTracker

- Built a crypto tracking web app using ReactJS and integrated a CoinGecko cryptocurrency API to display real-time prices, market stats, and coin details.
- Designed a responsive UI with dynamic routing and reusable components to ensure a smooth user experience and clean code architecture.

SKILLS

Languages : MERN Stack, MongoDB, Express.js, React.js, Node.js, Next.js, HTML, CSS, JavaScript, C++, SQL.

Tools : Git & GitHub.
